3 - BEDROOM HOUSE

reserve

... with carport

PLAN

This spacious, three-bedroom house with wood frame construction and brick veneer is ideal for the growing family. The three bedrooms are large enough for double beds and contain adequate closet space.

The bathroom is large, with two wash basins. Spaces for ample storage and linens are conveniently located. The kitchen and dining areas are combined, with a child's play area adjacent. The play area could easily become a family room or dining room if your family contains older children.

Access from the carport is through the play area. This leaves the living room entrance free of major traffic flow, providing for better furniture arrangement.

Connected to the carport is a storage space for garden tools and such. The laundry and freezer storage is accessible from the play area. This carport-laundry-storage complex can be added on at a later date by extending the trusses, if immediate funds are limited.

Working drawings may be obtained from the extension agricultural engineer at your State university. There may be a small charge to cover cost of printing.

If you do not know the location of your State university, send your request to Agricultural Engineer, Extension Service, U.S. Department of Agriculture, Washington, D.C. 20250. We will forward your request to the correct university.
